De propose then I make the follow additions true present building. 1. To erect a Cottage wing (A) (as above) at the L'out lastern Corner, for the accommodation of my own family, so that we man frie who Several rooms in the main building Which we at present occupy -

2. Is erect a 2 storey wing, at the Western End Which would contain a Achoolroom for fumor boys, & bedroom & reading room for the Officentices.

3. To erect a Chapel. At present the bays altend the Church in the village 13/4 miles distant.

But with the increase of the propulation the Church is already overcrowded When they all attend,

there would certain be no room for them if their numbers are increased.

Here buildings will logether cost according to a rough estimate about his Housand dollars.

Thave then & make two applications the 62. Department for assis lænce. 2. On an increased frast toward to annual support of the bays. 1. If I may venture trame a sum Iwould Suffert a trousand dollars (\$1000) towards the proposed buildings, of which amount, \$\$400 the paid has on the Completion of the Coliage Wing, \$300 on A Completion of the West Wing, +\$300 on the completion of the Chapel. In make this application I would beg tremind the Department that we have neither asked for or received anythis additional of the original frank made six years ago within the time that has classed Aire Hat frant was made, the Sixhundred Gollars paid the Wawanosh Home, being a fart of that original front made 6 years ago. Iwould also Suffest that think the amount of work we have been enabled & accomplish in proportion to the fovernment affellat will bear favorable Comparison with often kindred Institutions.

2. In regard to the Support of the bays, all Plat will ask for is fair assistance from the foverment in proportion the progress we may When to new building are completed we expect the able bothe 80 bays instead of 56. Thick is own fresent number. I will ask that the foverment will undertake always & Support at \$60 each fur annum half of the number of boys resident in the Institution. Hat is - that when we have 40 lays various in residence the fovermuch will provide for 20; When we have 50 boys, for 25; When we have 60 boys, for 30; When We have 70 boys, for 35; When we have to days + whoward for 40. Ivill ask that His plan man come ents operation from the Bannary next; which. means that from that date 25 bays man receive their Support from fovernment instead of 20 as at present. This will enable us take The more boy, making our total number 54. Statio 25 Supported & forerunt + 29 Supported
